

On behalf of Jacksonville University and the Sports Medicine Staff, welcome to Jacksonville University. In order to facilitate the ease of your trip, we are supplying the following information. If you have any questions or require special arrangements, please feel free to contact any member of the athletic training staff prior to your arrival at JU. The main athletic training room is located within the Athletic Field House.

If your team is traveling without an athletic trainer, please arrange in advance any treatments and send the necessary supplies. If your team is traveling with an athletic training student and/or requires the use of modalities, please send written instructions for each athlete to be treated.

The athletic training room will open approximately two hours prior to game time, and will remain open approximately one hour after the competition has ended. Please contact your specific sport athletic trainer for exact times and details. A team physician will be in attendance for all football, men's lacrosse and men's basketball games. A physician is on-call for all other events, and our primary emergency care hospital is Baptist Medical Center.
